Myraid

AI-Native Full Stack Engineer

Dear Hiring Team,

I'm applying for the AI-Native Full Stack Engineer role. I have 3 years of professional full-stack experience at a US-based medical-device company, building web apps, internal AI agents and a CRM. I use Claude Code every day and hold Claude Code in Action and Claude Code 101.

My strongest proof is in TypeScript, Node, React and PostgreSQL. My portfolio backend has rate limiting, signed webhooks and 10 end-to-end API tests. Orbital Surplus has race-safe stock holds, idempotent payments and 9 end-to-end API tests. On the agent side, I built multi-agent-research-crew and site-to-agent. I also penetration-tested 5+ live Play Store apps, so I review AI-written code with security in mind.

I have not run AWS in production, and I have not built video pipelines. I learn quickly, ship carefully and can start immediately from Pune. Portfolio: hussain-singapuri.vercel.app.

Kind regards,

Hussain Singapuri
