Stark digital media services pvt. ltd.
AI Engineer (Agentic & Generative AI)

Dear Hiring Team,

I am applying for the AI Engineer (Agentic & Generative AI) role. I am based in Pune and available immediately. I have 3 years of professional full-stack experience at a US-based medical-device company, where I built AI agents for internal use, a CRM and other apps.

Your posting asks for agents and RAG built end to end. site-to-agent is a grounded chat agent with hybrid BM25 + vector retrieval on pgvector, cited answers and an eval harness. multi-agent-research-crew runs tool-calling agents on a custom DAG orchestrator with retries, token budgets and claim-level citation checks. Both are in Python, with FastAPI and Claude or Gemini APIs elsewhere in my work. I use Claude Code daily and hold CCDV-F and CCAO-F.

I have not yet built voice, WhatsApp or OCR pipelines. ai-lead-receptionist (Twilio SMS and web chat, Claude, Supabase) covers the telephony and webhook side, and I would learn the rest quickly. My portfolio is at hussain-singapuri.vercel.app. I would welcome a conversation.

Kind regards,

Hussain Singapuri
