Systems Plus

React Developer

Dear Hiring Team,

I am applying for the React Developer role at Systems Plus. I have 3 years of professional full-stack experience at a US-based medical-device company, where I built and maintained web applications and a CRM. I am based in Pune and available immediately.

Your posting centres on React, JavaScript and TypeScript applications that connect to REST APIs and CRM systems. In Safey Inventory I built a React 19 operations tool with reusable shadcn/ui components. In PageForge, engagement flows to the HubSpot CRM, and my portfolio backend handles authentication, signed webhooks and 10 end-to-end API tests.

I enjoy making internal tools simple for the people who use them, with responsive, accessible interfaces. I have no contact center platform experience yet, but I learn integrations quickly. I would welcome the chance to discuss how I can support your Contact Center Technology team.

Kind regards,

Hussain Singapuri
