FlexTrade Systems

Software Developer - AI

Dear Hiring Team,

I'm applying for the Software Developer - AI role at FlexTrade Systems. I'm based in Pune and bring 3 years of professional full-stack experience at a US-based medical-device company, where I built and maintained web applications, a CRM and internal AI agents.

On the stack you list: I build front ends in React 19 and Next.js and back ends in Python (FastAPI) and Node.js, with Postgres, Docker and GitHub Actions. My portfolio backend has Stripe bookings, signed webhooks, scrypt auth and 10 end-to-end API tests, and Orbital Surplus has 9, so testable, maintainable code is a habit.

For your AI bonus points, I built site-to-agent (hybrid retrieval with an eval harness) and multi-agent-research-crew, and I hold the Claude Certified Developer - Foundations (CCDV-F) certification. I have not run production cloud workloads on AWS, Azure or GCP, but I pick up tools fast. My work is at hussain-singapuri.vercel.app and github.com/huss2003. I can start immediately.

Kind regards,

Hussain Singapuri
