AI Developer – AI Agents, Automation & Dashboards

Dear Hiring Team,

I am applying for the AI Developer role. I have 3 years of professional full-stack experience at a US-based medical-device company, where I built AI agents for internal use, several apps including a CRM, and security-tested 5+ live Google Play apps.

Your brief matches what I build. ai-lead-receptionist is a Claude agent that qualifies leads over SMS and web chat and books jobs. site-to-agent is a RAG agent with hybrid retrieval, citations and an eval harness. contractor-ai-ops-dashboard is a Next.js and Postgres dashboard with anomaly alerts and number-checked AI summaries. PageForge adds validator and reviewer approval before AI claims go out, the same human-approval idea you want for payments and refunds.

I am a Claude Certified Developer (CCDV-F) and use Claude Code daily. My automations so far are custom code with webhooks and CRM integrations rather than n8n, Make or Zapier, and I would pick up those platforms quickly. I am in India, available immediately, and happy to do the paid test task.

Kind regards,

Hussain Singapuri
