Gnani Innovations

Full Stack+AI Engineer

Dear Hiring Team,

I am applying for the Full Stack+AI Engineer role. I have 3 years of full-stack experience at a US-based medical-device company, where I built web applications, internal AI agents and a CRM. My daily stack is TypeScript, React, Next.js, Python, FastAPI and PostgreSQL, which matches your required skills.

On the AI side, I built multi-agent-research-crew, with planner, researcher, writer and verifier agents on a custom orchestrator with retries, token budgets and citation checks. I also built site-to-agent, a grounded RAG chat agent with an eval harness, and PageForge, a Next.js product where AI drafts only from approved facts and a validator checks the numbers. I use Claude Code every day and hold the Claude Code in Action and Claude Code 101 certifications.

I have not yet built voice agents or used LangChain or LangGraph professionally, but I ship quickly and learn new stacks fast. I am based in Pune, available immediately, and ready to grow into mentoring. My portfolio is at hussain-singapuri.vercel.app.

Kind regards,

Hussain Singapuri
