Alternative Path

Full Stack Developer

Dear Hiring Team,

I am applying for the Full Stack Developer role at Alternative Path. I have 3 years of professional full-stack experience at a US-based medical-device company, where I built web applications, a CRM and internal AI agents. I use Claude Code every day for scaffolding, debugging and test generation, and hold the Claude Code in Action and Claude Code 101 certificates.

Your stack is where my work sits: Node.js, React, Python and PostgreSQL. In Orbital Surplus (orbital-surplus.vercel.app, a demo store) I made checkout race-safe with a single-transaction stock hold and idempotent signed webhooks, backed by 9 end-to-end API tests. In site-to-agent (github.com/huss2003/site-to-agent) I built an AI feature with cited answers and an eval harness. lead-intel-engine is my FastAPI backend work.

I have not used AWS or MySQL in production; my hosting has been Vercel and Neon, with Docker and GitHub Actions. I learn new stacks quickly and would aim to contribute from the first month. I am in Pune, available immediately, and comfortable overlapping with client time zones. Portfolio: hussain-singapuri.vercel.app.

Kind regards,

Hussain Singapuri
