Solace Infotech

React JS Developer

Dear Hiring Team,

I am applying for the React JS Developer role in Pune. I have 3 years of professional full-stack experience at a US-based medical-device company, where I built and maintained web applications, several apps including a CRM, and internal AI agents.

React and Next.js are the core of my recent work. PageForge is built on Next.js 16 and React 19 with CMS, database, analytics and CRM integrations. Lumen, Cairnmoor and Kilnwood Roasters are Next.js sites with responsive layouts, and Cairnmoor includes a reduced-motion version. My backend work gives me solid REST API and JSON experience, including a portfolio backend with 10 end-to-end API tests.

I am based in Pune, available immediately, and happy to work on-site. Live demos and code are at hussain-singapuri.vercel.app and github.com/huss2003. I would welcome a conversation about the role.

Kind regards,

Hussain Singapuri
